Road Forward

C++ is multi-paradigm

Procedural: Better C

• Object-Oriented: Encapsulation, Inheritance, and Polymorphism

Generic: Templates

Reuse is Key

Macros

Library functions

• Function Overloading (Static Polymorphism)

• Inheritance & Dynamic Polymorphism

Templates & STL

Design Patterns

• Designing good data types is a key for good programming in C++

• While programming in C++, we should keep an eye on:

Efficiency

Safety

Clarity

Do not write C-style programs using C++ compiler
